

John Rockwell

Software Engineer in Las Vegas, NV | j@jrockwell.dev | (760) 673-6838

WORK EXPERIENCE

Wesco

October 2022 - Present

Senior Developer

Remote

- Designed and implemented solutions for Cart, Checkout and Product Display functionality across 25 different brands within a multi-brand system.
- Improved developer experience by creating a design system workflow that automatically deploys to every brand directly from Figma.
- Collaborated on the development of GitHub actions to automatically deploy developer branches for testing, add quality gates to ensure unit test coverage meets requirements and conduct performance evaluations.
- Led the interview and onboarding process for 6 engineers with an iterative interview process designed to test the engineers overall capabilities and thinking patterns.
- Authored comprehensive documentation for Cart, Checkout, Product Display and Design System codebases.

Credit One Bank

December 2021 - October 2022

Web Engineer II

Las Vegas, NV

- Modernized Credit One's corporate and acquisition platforms using React, JavaScript, TypeScript and Java built on top of Adobe Experience Manager (AEM).
- Leveraged Adobe Target to create personalized user experiences and perform A/B Testing on all major site components to improve click rate.
- Created internal tooling to automate developer processes and reduce environment setup time from 1 day to 15 minutes by implementing a Command-line Interface (CLI) that interfaced with the companies Artifactory service using Golang, Node.js, Python and Docker.

Independent Contractor

September 2018 - December 2021

Software Development and Brand Consulting

Palm Springs, CA

- Designed and developed landing page sites using Squarespace, Shopify and Shopify Headless with React.
- Developed individualized solutions using Node.js, Express.js and React.
- Maintained a catalog of over 20 client sites while offering new development solutions and maintenance.
